

Short CV: Joep Beumer studied Biomedical Sciences at the University Utrecht, The Netherlands, where he graduated in 2015. In 2020, he received his PhD in stem cell biology from the University Utrecht, for his work on differentiation of intestinal stem cells in the lab of Hans Clevers. In 2022, he became a junior group leader at the Roche Institute of Human Biology in Basel, Switzerland. Here, his lab is building high-throughput genetic perturbation strategies in adult organoid models to study homeostatic renewal as well as onco of the gastrointestinal epithelium
